

COMPANY PROFILE

WISUMU

FUTURE OF TECHNOLOGY FOR A HEALTHIER, SUSTAINABLE WORLD...

- **About Us**
- WISUMU is a technology development company dedicated to creating groundbreaking solutions that improve human health, promote environmental sustainability, and revolutionize energy consumption. Based in the Philippines, we are driven by innovation and a commitment to making a positive impact on society. We, visionaries are constantly pushing the boundaries of what's possible, developing cutting-edge technologies that address some of the world's most pressing challenges.
- **Our Mission**
- To develop and deploy innovative technologies that enhance human well-being, protect our planet, and create a more sustainable future for all.
- **Core Technologies**
- 1. Frequency Device for Healing
- We are developing a revolutionary frequency device designed to promote healing and wellness within the human body. This technology utilizes specific frequencies to target and revitalize organs, supporting natural healing processes and overall health. Our research focuses on non-invasive, holistic approaches to improve quality of life and well-being.

- **2. Free Energy Battery**
- WISUMU is at the forefront of energy innovation with our self-charging "Free Energy Battery." This groundbreaking technology eliminates the need for external charging, providing a sustainable and continuous power source. Ideal for a wide range of applications, from personal electronics to industrial equipment, this battery promises to transform how we use and conserve energy.

- **3. LPG Substitute**
- Addressing safety and efficiency in energy consumption, we have developed a Liquified Petroleum Gas (LPG) substitute that offers enhanced performance without the risk of explosion. Our gas alternative provides higher heat temperatures compared to traditional LPG, making it a safer and more effective solution for both residential and commercial use.

- **4. Hybrid Car Conversion**
- WISUMU is committed to reducing carbon emissions and promoting sustainable transportation. Our hybrid car conversion technology transforms traditional gasoline-powered vehicles into hybrid systems that run on a combination of gas and water. This innovative solution not only reduces fuel consumption but also minimizes environmental impact, paving the way for a cleaner, greener future.

WISUMU

FUTURE OF TECHNOLOGY FOR A HEALTHIER, SUSTAINABLE WORLD...

- **Our Vision**

- To be a global leader in technology development, recognized for our innovative solutions, commitment to sustainability, and dedication to improving the lives of people around the world.

- **Values**

- - Innovation: We embrace creativity and continuously seek new and better ways to solve complex problems.
 - - Sustainability: We are committed to developing technologies that protect our planet and promote a sustainable future.
 - - Integrity: We operate with the highest ethical standards, ensuring transparency and accountability in all our endeavors.
 - - Impact: We strive to create technologies that make a meaningful and positive difference in the world.
-
